

Pryce Mining Services Built on experience

C A P A B I L I T Y S T A T E M E N T

OUR VISION

As fourth generation miners, our Vision is to create employment opportunities and provide training and knowledge for our employees. We strive to be a mining services contractor, known for quality and reliability.

OUR MISSION

We will achieve our Vision through understanding our customer's individual needs, our employee's needs and, above all, conduct our business with integrity.

Leading through experience, understanding what clients want.

Safety

The company views Occupational Health & Safety and protection of the environment as core elements of a strong business. Pryce Mining Services seeks to create a supportive work environment where every employee feels confident that work is being carried out in a safe manner and without harm to the environment.

Trust

Trust is the cornerstone of every relationship, whether it be with our clients or our employees. We expect our employees and clients to act with integrity and honesty and with full transparency to achieve the best outcome for all parties.

Accountability

Our management team and employees are responsible for the performance, behaviours and actions in the workplace. This responsibility leads to increased levels of competency, morale and job satisfaction.

Relationships

Building a strong relationship with our employees, clients and the community is vital in maintaining a successful business. Understanding our stakeholder's needs and priorities creates a vibrant work environment.

ABOUT US

Pryce Mining Services (originally Pryce Brothers) was established in 2006 by brothers Lewis and Matthew Pryce as a small mining contractor company. Since then, Pryce Mining Services has grown to become a leading mining and electrical contractor service, predominantly supporting the Goldfields region of Western Australia.

When you contact Pryce Mining Services, you speak with the people who own the business; a team with more than 30 years of experience operating in the mining industry.

For clients, this means they speak directly with people who understand their needs and can recommend and implement a solution quickly and without fuss.

Based in Kambalda, we can easily mobilise to be onsite whenever and wherever you need us. We guarantee professionalism and quality workmanship for every project we undertake.

WHAT WE DO

Pryce Mining Services provides underground labour, equipment and electrical services to the Australian mining industry.

We specialise in providing contract labour hire in support of projects across Western Australia. From new installations, surface and underground works for new/existing mines; our team of experienced, qualified professionals is available to meet your electrical project and staffing needs.

We also offer wet and dry hire of quality underground electrical infrastructure including jumbo starters, pump starters, distribution boards, transformers, and substations. We use only the highest quality parts and service our equipment regularly meaning it's ready to go when you need it most.

CAPABILITIES FOCUS

Mining Services

Pryce Mining Services supply quality, experienced, professional mining staff to sites across Western Australia. We regularly source and deploy staff including:

- ➔ Project Managers
- ➔ Specialists in Narrow Vein Ore Extraction
- ➔ Underground Managers
- ➔ Engineers
- ➔ Mine Foreman
- ➔ Underground Shift Supervisors
- ➔ Underground Operators
- ➔ Underground Trainers
- ➔ Underground Safety Advisors
- ➔ Underground Fitters

Pryce Mining Services was instrumental in assisting Macmahon with the mobilisation and ramp-up of the contract at the Gwalia mine site for St Barbara Mines Ltd. They provided professional management coverage and used their industry contacts to attract quality personnel to the mine for Macmahon. Macmahon continues to use Pryce Mining Services for management coverage and labour hire recruitment today, across all of our underground operations.

Michael Foulds

General Manager, Macmahon Underground

CAPABILITIES FOCUS

Electrical Services

Pryce Mining Services can supply/refurbish/hire out the following underground electrical infrastructure to suit short and long-term requirements:

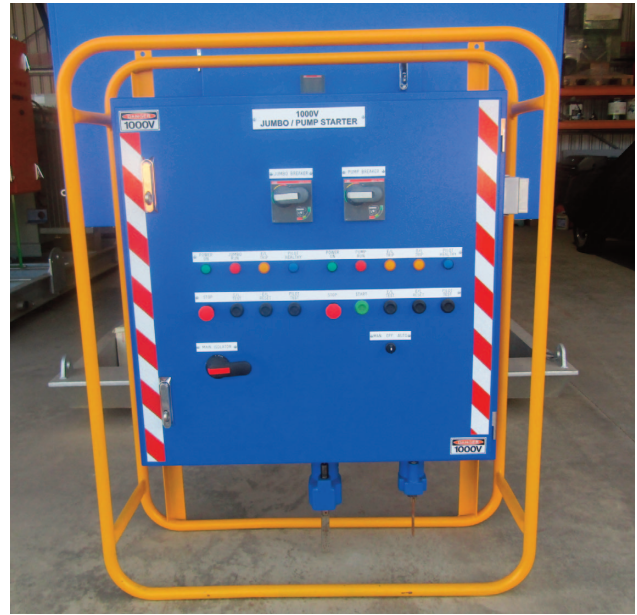

1. Jumbo Starters
2. Jumbo / Pump Starters
3. Pump Starters
4. Fan Starters
5. Mono Pump Starters
6. Distribution Boards
7. Transformers
8. Substations

We build our mining infrastructure to meet customer specifications and we only use the highest quality parts.

At Pryce Mining Services, we specialise in providing contract labour hire to support projects across Western Australia. From new installations, to surface and underground works for new/existing mines; our team of experienced, qualified professionals is available to meet your electrical project and staffing needs.

We have expertise in:

- ➔ Electrical Supervision
- ➔ Underground Electrical Labour Hire
- ➔ Electrical Consulting / Costing
- ➔ Electrical Project Work / Design and Installation
- ➔ Switchboard Construction / Hire and Refurbishment
- ➔ Transformer Sales and Hire
- ➔ Bore Field Installation and Maintenance
- ➔ Pump Servicing / Repairer and Hire

I chose Pryce Mining Services because they are a locally based Goldfield's mining and electrical contractor. Their electrical enclosures are some of the best boxes I've used and product back up and support issues are resolved quickly and efficiently.

Apart from excellent electrical enclosures, we also chose Pryce Mining Services for the supply and installation of our last three, 2MVA 11kv/1000v UG sub stations - each one was delivered, installed and commissioned efficiently with minimal interruption to mining activities. The company and staff are easy to work with and fully complement our site electricians. I have no reservations recommending Pryce Mining Services to any mining company.

Robert Chisholm

U/G Electrical Supervisor, Silverlake Resources

EQUIPMENT HIRE AND SALES

Mining (wet and dry hire)

We supply wet / dry hire services and sell quality mining equipment. Currently available, we have:

SANDVIK DD311D – Single Boom Jumbo

The Sandvik DD311D Single Boom Jumbo is a fully autonomous unit based on self-contained diesel hydraulic carrier, with on-board water tank and large air compressor for air-mist flushing.

The drill rig does not require any connection to external power nor water hose, thus allowing fast set up and removal in production areas. The drill has a 14ft fixed rail and can drill up to a 3.1m hole.

The high frequency rock drill enables fast drilling, and the drill rig layout is designed for good visibility and stability. This, and the powerful four-wheel-drive articulated carrier, ensures fast and safe manoeuvring in narrow drives. The drill comes complete with a HLX5 Rockdrill on the boom and a spare.

CATERPILLAR 930G Integrated Tool Carrier

The 930G is a multi-purpose tool carrier mostly used in underground mining applications.

Complete with AFFF, basket lock out and anchor points, this machine is ready for underground use.

The machine comes complete with the following implements:

- ➔ Twin Stage Basket
- ➔ Single Stage Basket
- ➔ Forks
- ➔ Jib
- ➔ Bucket

Electrical (dry hire)

The electrical equipment we have available for dry hire includes:

- ➔ 11KV – 1KV 2MVA SUBSTATION (6 OUTLETS)
- ➔ 415V – 11KV 2MVA STEP UP TRANSFORMER
- ➔ 415V – 11KV 1MVA STEP UP TRANSFORMER
- ➔ 415V – 1KV 2MVA STEP UP TRANSFORMER
- ➔ 415V – 1KV 1MVA STEP UP TRANSFORMER
- ➔ 415V – 1KV 500KVA STEP UP TRANSFORMER
- ➔ 415V – 1KV 200KVA STEP UP TRANSFORMER

LABOUR HIRE

The Pryce Mining Services team has more than 30 years' experience in the mining industry. For our staff, this means they can feel confident we know and understand the problems they may face, and we are ready and available to provide guidance and support.

For our clients, this means each staff member we deploy to site is backed by a network of career professionals, ensuring quality workmanship and professionalism in every job. We are proud to offer quality personnel in a tough market to meet our client's requirements.

Current Vacancies

We are always on the lookout for professional staff who understand the importance of safety, have a good attitude and work ethic, and are reliable problem solvers.

We hand-pick our underground mining team so we can provide the best service to our customers and develop a great team environment.

Our rates are competitive and we believe in investing in our staff's growth. That's why we enjoy sharing our knowledge. We are proud to have enabled our staff to transition to other clients in permanent positions in support of their career goals.

So, if you're punctual, organised, can think on your feet and work autonomously, we want to hear from you.

All candidates must be eligible to work in Australia and be able to:

- ➔ Pass a pre-employment medical
- ➔ Pass a Drug & Alcohol Screen
